

DOCK ENCLOSURES

**MANUFACTURED BY
CUSTOM FABERKIN**

Model CF75 - Dock Seal With Head Pad

The CF75 is designed to form an effective seal, ideal for door openings up to 9' high. The three-piece unit retains conditioned air, and effectively blocks entry of outside weather conditions. For a complete seal when servicing smaller delivery trucks, drop curtains can be added to the head pad.

Standard Features of Custom Faberkin's Dock Enclosures

- Standard seal projection is 10".
- Breather grommets are strategically placed at the bottom of each side pad and head pad to reduce moisture build-up and assure complete memory retention.
- Polyurethane Foam Pads are mounted on hand selected structural grade, treated lumber.
- All side pads are manufactured with a 3" guide stripe and are designed to close down all door openings for an optimal seal.

Since 1968, Custom Faberkin has been providing quality products for the material handling industry. Our commitment to excellence is shown through our quality products.

• Saving Energy

Expensive conditioned air stays inside when trailers are being accessed.

• Adding Value

Improved interior temperature control, offering a healthier working environment, sealing out cold, wind, rain, dust and fumes.

• Sealing-In Security

Minimizes security concerns during loading and unloading.

For additional abrasion resistance: Wear Pleats available in 4", 8" and 16" exposures.
