Roller Curtain Information & Installation

Custom Faberkin's Roller Curtain is designed as an alternative to our Accordion Style Skirts when space is limited.

Benefits of the Custom Faberkin Roller Curtain

- Clean simple application
- Strong 23oz Coated Vinyl ** Outperforms all others
- Ideal when space is restricted and for one sided applications

The steel roller is a spring loaded, non-locking mechanism which can be mounted at the bottom of the lift, or on the floor. The top edge of the curtain is fabricated with a pocket so that a mounting bar will easily slip through and can be attached to the outside edge of the platform. Flat Bar hardware and Velcro Top mounting are available upon request.

To Begin Installation:

- Attach the mounting brackets at desired location.
- Attach the curtain (fabric) to the table edge.
- Adjust the tension of the roller by using a vise grip or pliers to the square pin and rotate clockwise approximately ten (10) revolutions.
- Insert the roller curtain into the brackets, being careful to match the round pin and square pin of the roller with the brackets.
- The roller curtain should be taunt at all times – if the fabric becomes loose, remove the roller and turn the square pin two or three additional revolutions.

Please contact us with any questions. Our sales staff looks forward to working with you.
